8 Lisää oikeuksia

API permissions

Applications are authorized to use APIs by requesting permissions. These permissions show up on the consent page and can be granted/denied.

[+ Add a permission](#)

API / PERMISSIONS NAME	TYPE	DESCRIPTION
▼ Azure Active Directory Graph (1)		
User.Read	Delegated	Sign in and read user profile

These are the permissions that this application requests statically. You may also request user consentable permissions dynamically through code. [See best practices for requesting permissions](#)

- Embed flow templates and manage flows
- OneNote
Create and manage notes, lists, pictures, files, and more in OneNote notebooks
- SharePoint
Interact remotely with SharePoint data

Request API permissions

< All APIs

SharePoint
<https://microsoft.sharepoint-df.com/> Docs

SharePoint APIs are available via the Microsoft Graph API. You may want to consider using Microsoft Graph instead.

What type of permissions does your application require?

- Delegated permissions**
Your application needs to access the API as the signed-in user.
- Application permissions
Your application runs as a background service or daemon without a signed-in user.
